Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-3, 6-17, 20-26, 28-41, 43, 44 and 46 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Nelson et al #65644104.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4, 5 18 19 27 42 45 rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson #6564104 in view of Failandier #5800473.

Nelson discloses a centralized management system. It includes (fig 2) a network, central server (220+) and device programmer (112+.) Not disclosed by this reference is the plurality of expert systems. Failandier discloses an automated system for updating implantable medical devices. The device allows the user to select from a plurality of

expert systems. Given this teaching it would have been obvious to add a selection of expert systems to Nelson's device given Failandiers teaching of this.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
